Narsapur, Andhra Pradesh | +91 8096381549 | chanduarasavalli95@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer with strong foundations in Data Structures, scalable backend systems, and full-stack development. Experienced in building secure, user-centric applications using Python, Java, React, and FastAPI. Hands-on with CI/CD, cloud deployment, and AI-assisted systems using LLM APIs. Strong focus on performance, reliability, and solving real-world problems.

EDUCATION

Bachelor of Technology in Computer Science (2022 - 2026)
Swarnandhra College of Engineering & Technology, Narsapur
GPA: 8.64 / 10

TECHNICAL SKILLS

Programming: Python, C, Java, JavaScript (ES6+)

Core CS: Data Structures, Algorithms, OOP, System Design, SDLC, Agile Development, Software Testing

Backend & Systems: FastAPI, Flask, REST APIs, Microservices (Basics), API Security, Authentication (JWT)

Frontend: React, HTML, CSS, Tailwind

Databases: SQL (MySQL), MongoDB

AI & GenAI: LLM API Integration, Prompt Engineering, AI-powered automation workflows

Tools & DevOps: AWS (IAM, S3, EC2), GCP, Firebase, Git, GitHub, Docker, Linux, GitHub Actions (CI/CD), Redis

IoT: ESP8266/ESP32, RFID, GPS, Drone Technology, raspberry pi

EXPERIENCE

Full Stack & Platform Operations Intern - IndoNalandaTech (Jul 2025 - Dec 2025)

- Designed, developed, tested, and deployed scalable web applications using React, Flask, and MongoDB.
- Designed **CI/CD pipelines**, reducing deployment effort by ~70%.
- Debugged, tested, and optimized REST APIs to improve application reliability and performance.
- Deployed and monitored production systems on Linux.

2D Game & Web Developer Intern - VJtha Learning Educational (Aug 2024 - Jan 2025)

- Developed and maintained production web applications serving over 10,000 users.
- Optimized backend APIs to improve response time and performance.
- Delivered production-ready features under tight deadlines.

PROJECTS

Swarnandhrian - Student Training Platform (React, FastAPI, Docker, Redis, MongoDB)

- Built a scalable platform for **2000+ students** with role-based access.
- Developed a **Docker-based code execution microservice** for secure multi-language evaluation.
- Implemented **CI/CD pipelines** for automated deployment.
- Improved performance and reliability through caching, debugging, and optimized APIs.

MediSlot - AI-Assisted Appointment Booking System (React, FastAPI, MongoDB)

- Built a real-time appointment scheduling system with structured workflows for doctors and patients.
- Integrated LLM-based symptom analysis to recommend relevant doctors and improve decision accuracy.
- Improved booking efficiency and user experience through optimized workflows.

Smart Checkout System (React, Flask, MongoDB, ESP8266)

- Designed IoT-enabled automated billing system with real-time data processing and optimized backend.
- Reduced average checkout time by **~70%** through optimized backend processing.

ACHIEVEMENTS & LEADERSHIP

- Vice Chair - IEEE Student Branch; led inter-college technical events and coding competitions
- Qualified GATE 2026 (CS&IT)
- Winner: Coding & AI/ML Presentation; Runner-up: Project Expo (same day)
- Gave Training on Drone Technology for Army Personals & NCC Cadets
- NCC Cadet (B Certificate, Grade A) & NSS Volunteer

CERTIFICATIONS

- NPTEL: Data Analytics using Python (Silver Medal), C Programming (Silver Medal)
- AWS: Cloud Practitioner
- AICTE: Google AI/ML Internship
- Infosys: Robotic Process Automation (Grade A)
